

# 216 - 6SWH - HELIX

Thermoplastic multispiral hose for UHP water based applications from 1600 to 2800 bar (from 23200 to 40600 psi)

## **FEATURES**

#### Inner Tube

DN 5-8: Polyoxymethylene (POM); DN 12: Polyamide (PA)

#### Reinforcement

Six spiral layers of steel wire

## Cover

Special Polyester Copolymer, non pinpricked, laser branding

## **Industrial Applications**

Waterjet cutting // Heat Exchanger Tube cleaning // Surface preparation and paint removal // Hydro demolition // Ships, tanks and vessel cleaning // Waterblast // General industrial cleaning // Removal of accumulated dirt from surfaces.

# Hydraulic Applications

 $\label{lem:hydraulic} \mbox{Hydraulic jacks // Bolt tensioning // Pressure Testing applications // General UHP hydraulic applications}$ 

## Temperature Range

-30°C to 60°C (-22°F to 140°F)

#### Features

Ultra high working pressure // Excellent chemical resistance // Resistance to ozone, ultraviolet light and aging // High resistance against abrasion // Low volumetric expansion at maximum working pressure // Resistant to sea water // High impulse resistance // Long length capability // Excellent cut and crush resistance

## Description

Ultra High Pressure hose utilising high tensile steel wire applied in counter rotating multiple spiral layers. Tube and cover of engineering polymer with intermediate adhesion layers.

Available As Factory Made Assemblies: Please Contact Our Sales Office For Further Details.

<sup>\*</sup> The safety factor between the burst pressure and working pressure depend on the application requirements. Four to one (4:1) safety factor should be used in dynamic impulsing hydraulic applications.

The maximum WORKING PRESSURE of the assembly can be found marked on each sleeve of the assembly and on the pressure test report.

<sup>\*\*</sup> The maximum WORKING PRESSURE of an assembly is given by the component having the lowest working pressure. This means that if the working pressure of a fitting is lower than the working pressure of the hose, the WORKING PRESSURE of the fitting becomes the WORKING PRESSURE of the entire assembly.
